ntd.1 Derivability and the Propositional Connectives

fol:ntd:ppr:sec

Proposition ntd.1.

fol:ntd:ppr:prop:provability-land

fol:ntd:ppr:prop:provability-land-left

fol:ntd:ppr:prop:provability-land-right

1. *Both* $\varphi \wedge \psi \vdash \varphi$ *and* $\varphi \wedge \psi \vdash \psi$
2. $\varphi, \psi \vdash \varphi \wedge \psi$.

Proof. 1. We can derive both

$$\frac{\varphi \wedge \psi}{\varphi}\,\wedge\text{Elim} \qquad \frac{\varphi \wedge \psi}{\psi}\,\wedge\text{Elim}$$

2. We can derive:

$$\frac{\varphi \qquad \psi}{\varphi \wedge \psi}\,\wedge\text{Intro}$$

□

fol:ntd:ppr:prop:provability-lor

Proposition ntd.2.

1. $\varphi \vee \psi, \neg\varphi, \neg\psi$ *is inconsistent.*
2. *Both* $\varphi \vdash \varphi \vee \psi$ *and* $\psi \vdash \varphi \vee \psi$.

Proof. 1. Consider the following derivation:

$$\dfrac{\varphi \vee \psi \qquad \dfrac{\neg\varphi \qquad [\varphi]^1}{\bot}\,\neg\text{Elim} \qquad \dfrac{\neg\psi \qquad [\psi]^1}{\bot}\,\neg\text{Elim}}{\bot}\,{}^1\vee\text{Elim}$$

This is a derivation of $\bot$ from undischarged assumptions $\varphi \vee \psi$, $\neg\varphi$, and $\neg\psi$.

2. We can derive both

$$\frac{\varphi}{\varphi \vee \psi}\,\vee\text{Intro} \qquad \frac{\psi}{\varphi \vee \psi}\,\vee\text{Intro}$$

□

fol:ntd:ppr:prop:provability-lif

Proposition ntd.3.

fol:ntd:ppr:prop:provability-lif-left

fol:ntd:ppr:prop:provability-lif-right

1. $\varphi, \varphi \to \psi \vdash \psi$.
2. *Both* $\neg\varphi \vdash \varphi \to \psi$ *and* $\psi \vdash \varphi \to \psi$.

Proof. 1. We can derive:

$$\frac{\varphi \to \psi \qquad \psi}{\psi} \to\text{Elim}$$

2. This is shown by the following two derivations:

$$\dfrac{\dfrac{\dfrac{\neg\varphi \qquad [\varphi]^1}{\bot}\neg\text{Elim}}{\psi}\bot_I}{\varphi \to \psi}{}^{1}\to\text{Intro} \qquad\qquad \dfrac{\psi}{\varphi \to \psi}\to\text{Intro}$$

Note that $\to$Intro may, but does not have to, discharge the assumption φ. □
