sc.1 Soundness of Axiomatic Derivações

int:sc:sax:
sec

The soundness proof relies on the fact that all axioms are intuitionistically valid; this still needs to be proved, p.ex., in the Semantics chapter.

int:sc:sax:
thm:soundness

Teorema sc.1 (Soundness). *If $\Gamma \vdash \varphi$, then $\Gamma \models \varphi$.*

Prova. We prove that if $\Gamma \vdash \varphi$, then $\Gamma \models \varphi$. The proof is by induction on the number n of fórmulas in the derivação of φ from Γ . We show that if $\varphi_1, \dots, \varphi_n = \varphi$ is a derivação from Γ , then $\Gamma \models \varphi_n$. Note that if $\varphi_1, \dots, \varphi_n$ is a derivação, so is $\varphi_1, \dots, \varphi_k$ for any $k < n$.

There are no derivações of length 0, so for $n = 0$ the claim holds vacuously. So the claim holds for all derivações of length $< n$. We distinguish cases according to the justification of φ_n .

1. φ_n is an axiom. All axioms are valid, so $\Gamma \models \varphi_n$ for any Γ .
2. $\varphi_n \in \Gamma$. Then for any $\mathfrak{M}$ and w , if $\mathfrak{M}, w \Vdash \Gamma$, obviously $\mathfrak{M} \Vdash \Gamma \varphi_n[w]$, O.s., $\Gamma \models \varphi$.
3. φ_n follows by MP from φ_i and $\varphi_j \equiv \varphi_i \rightarrow \varphi_n$. $\varphi_1, \dots, \varphi_i$ and $\varphi_1, \dots, \varphi_j$ are derivações from Γ , so by inductive hypothesis, $\Gamma \models \varphi_i$ and $\Gamma \models \varphi_i \rightarrow \varphi_n$.

Suppose $\mathfrak{M}, w \Vdash \Gamma$. Since $\mathfrak{M}, w \Vdash \Gamma$ and $\Gamma \models \varphi_i \rightarrow \varphi_n$, $\mathfrak{M}, w \Vdash \varphi_i \rightarrow \varphi_n$. By definition, this means that for all w' such that Rww' , if $\mathfrak{M}, w' \Vdash \varphi_i$ then $\mathfrak{M}, w' \Vdash \varphi_n$. Since R is reflexive, w is among the w' such that Rww' , O.s., we have that if $\mathfrak{M}, w \Vdash \varphi_i$ then $\mathfrak{M}, w \Vdash \varphi_n$. Since $\Gamma \models \varphi_i$, $\mathfrak{M}, w \Vdash \varphi_i$. So, $\mathfrak{M}, w \Vdash \varphi_n$, as we wanted to show. $\square$
